

**TESTIMONY OF FERNANDO MORALES SUBMITTED TO THE APPROPRIATIONS AND HIGHER EDUCATION
COMMITTEE ON FEBRUARY 10, 2016**

***H.B. No. 5044 - An Act Making Adjustments to State Expenditures for the Fiscal Year Ending
June 30, 2017.***

Co-Chairs, Ranking Members, and members of the Committee, I am currently the board chair for Central Area Health Education Center (AHEC), Inc. Central AHEC is a nonprofit organization headquartered in the city of Hartford, CT and serves Hartford, Middlesex and Tolland counties. For years Central AHEC has been providing students with valuable resources and hands on experiences to explore different health careers. Through the YHSC and CHSC programs, students have learned and practiced valuable skills such as leadership, volunteer service and cultural sensitivity. Without these programs, these students will not be able to become inspiring health professionals, obtain CPR certification or implement meaningful service learning projects in our community. I am a resident of Manchester, Hartford County CT.

The CT AHEC Program or network directly supports primary care workforce development in the state by “connecting students to careers in health, professionals to communities, and communities to better health.” Funded since 1997, the CT AHEC Program provides state-wide services to more than 10,000 residents, annually (<http://www.publichealth.uconn.edu/ct-ahec.html>). As the demographics of the state continue to change, the primary care workforce must expand and respond to meet those changes. The CT AHEC Program is an invaluable resources to address these challenges at both a state and local level.

The CT AHEC Program utilizes federal, state and private funding to support:

- Inter-professional education and community based training programs for health professions students
- Promotion and retention of primary care providers in collaboration with state agencies
- Cultural competence and medical interpreting training to health professionals and trainees
- Dissemination and recruitment of health professional trainees in the National Health Service Corps
- Continuing medical education programs for public health and health care professionals
- pipeline educational programs to raise awareness of health careers for pre-health professions learners

As part of the primary care workforce development in the state, the CT AHEC Program provides leadership for the State Innovation Model grant’s Community Health Workforce Development and Integration (<http://www.healthreform.ct.gov/ohri/site/default.asp>). Bringing collaborative stakeholders together to build infrastructure, policy and sustainability to the development of a Community Health Worker workforce in Connecticut. Likewise, CT AHEC’s support of the Health Occupations and Technology Careers in Connecticut (HOT Guide) provides residents with an invaluable resource to learn about health and biotechnology careers and opportunities in the state (www.healthcareersinct.com).

Supported by federal, state and private dollars, the CT AHEC Program Office is located at UConn Health in Farmington, CT. The 4 regional AHEC Centers in collaboration with the Program Office extend UConn Health’s reach state-wide. The AHEC Program responds to local needs and partnerships that address community health needs which include oral health, veteran’s mental health, youth mental health first aid, teen health literacy, homeless and migrant farm worker access to health care.

I have been fortunate to be part of this agency and its programs as the board chair and I must admit that reducing or eliminating funding in anyway will only be a dis-service to those young individuals that have been able to fulfill a commitment not only to themselves, but to improve health outcomes in their communities by incorporating the learning curricula that AHEC has provided for many years. I urge you to consider what a detriment this would be to these individuals that are making every effort to bring change and end health disparities to those that need it the most.

In addition, Central Area Health Education Center (AHEC), Inc. is part of the Connecticut AHEC Network (CTAHEC) and was the first nonprofit 501(c)(3) AHEC to open its doors in Hartford, Connecticut in 1997.

I cannot express the consequences and unreplaceable void this would leave for the state of Connecticut. I personally feel that if CT AHEC Network is not restored its funding that it would be very detrimental to the community.

Thank you for your consideration of my testimony. Below is my contact information for your convenience.

Fernando Morales
